360 Photo creation Tutorial

The Insta360 One X2 is a 360-degree camera that allows you to capture immersive photos and videos. Here's a guide on how to use it and connect it to its app:

Using the Insta360 One X2 Camera:

1. Power on the Camera:

- Press and hold the power/mode button on the camera until the camera's indicator lights up. The camera will start up.

2. Capture Photos and Videos:

- To take a 360-degree photo, press the shutter button.
- To record a 360-degree video, switch to video mode by tapping the mode button on the camera.

3. Adjust Settings:

- You can change various settings on the camera using the touchscreen display. Swipe down from the top of the screen to access the settings menu. You can adjust settings like exposure, ISO, and white balance.

4. Viewing and Playback:

- You can review and preview your photos and videos on the camera's touchscreen.
- To access more detailed settings and controls, you can connect the camera to the Insta360 app.

Connecting the Insta360 One X2 Camera to the App:

1. Install the App:

- Download and install the Insta360 app from the App Store (iOS) or Google Play Store

(Android).

2. Connect via Wi-Fi:

- Ensure that your camera's Wi-Fi is turned on. You can access the Wi-Fi settings on the camera's touchscreen.
- In the Insta360 app, tap the camera icon or the "+" button to add a camera.
- Select your camera from the available Wi-Fi networks, and enter the password if prompted.

3. Control and View Content:

- Once connected, you can use the app to control the camera remotely, view a live preview, and transfer photos and videos to your mobile device.

4. Edit and Share:

- The Insta360 app provides editing tools and features to enhance your 360-degree content. You can add effects, trim videos, and edit photos.
- After editing, you can easily share your photos and videos on social media or other platforms directly from the app.
