# Marketing with AI
# Music & Vocal Effects

# 1º What is Uberduck?

- • Uberduck is an API platform for generating songs, lyrics, and videos with AI.

With Uberduck, you can generate lyrics on any topic with AI, generate a song that contains those lyrics, and render a lyrics video for your song.

You can use set the lyrics to your own custom beats, create custom designs for your video (on our Enterprise plan), and even add user-submitted images to your video designs.

# 2. Using the Uberduck

There are several options to use Uberduck to create voices using this framework.

- • Text to Voice

- • Voice to voice

- • AI Generated Rap

- • Clone Your Voice

- • Your Private Voices

in this workshop we are going to work with AI Generated Rap

There are 4 steps
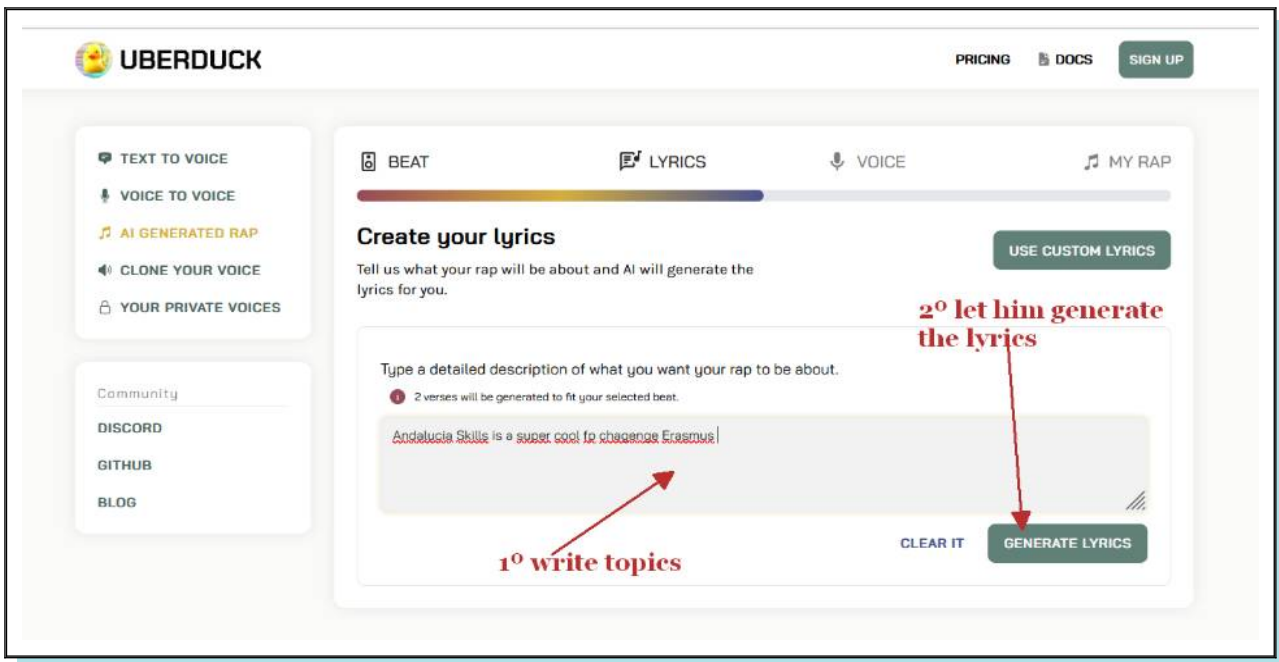

BEAT > LYRICS > VOICE > MY RAP

## 1º Select a beat. Click the play button to hear the beat.
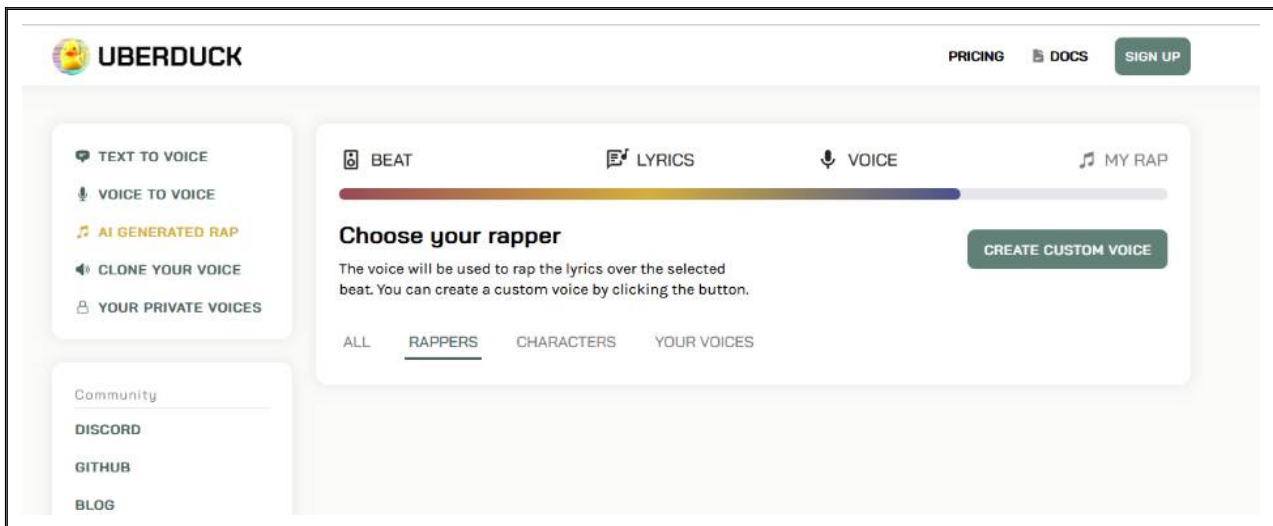

## 2º Create your lyrics

Tell us what your rap will be about and AI will generate the lyrics for you.

Type a detailed description of what you want your rap to be about.

## 3º Choose your rapper

The voice will be used to rap the lyrics over the selected beat. You can create a custom voice by clicking the button.

## 4º save the rap
