

360 Kuula Virtual Tour Creation Workshop

Step 1 Access to the web site <https://kuula.co/> and press in register.

Step 2

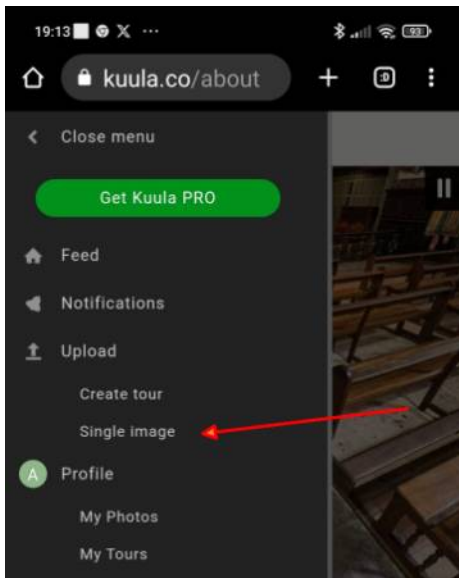

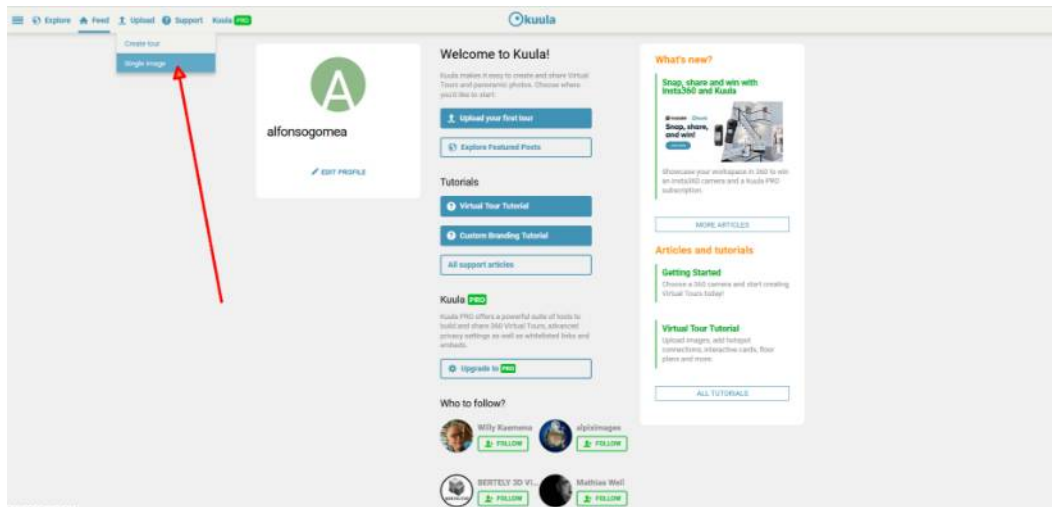

Register by email and select basic free account .

Step 3

Select create a single image

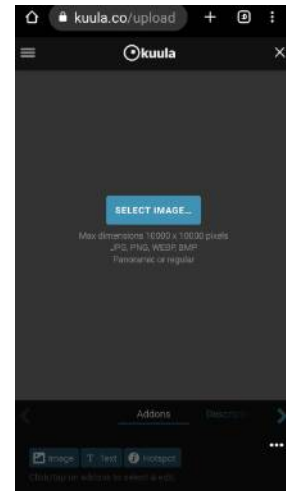

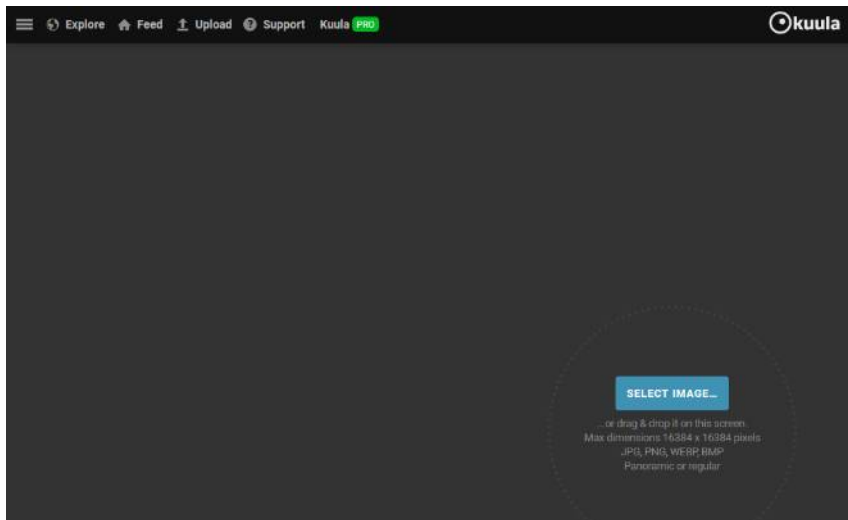

this in pc --->

this in android mobile
phone

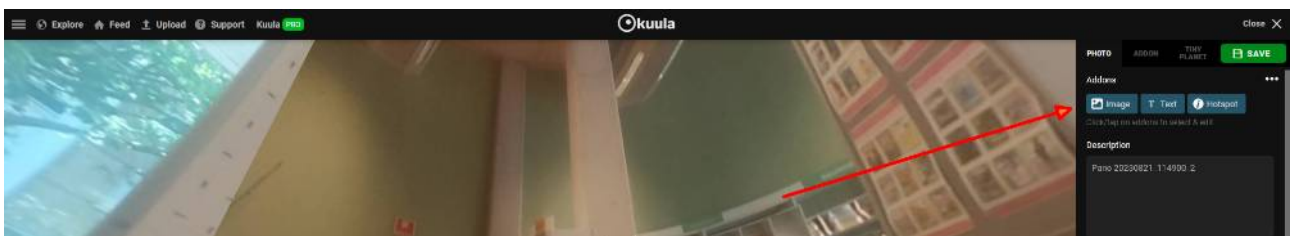

Step 4

first select one of the photos that we made in the previous activity and then we can edit them

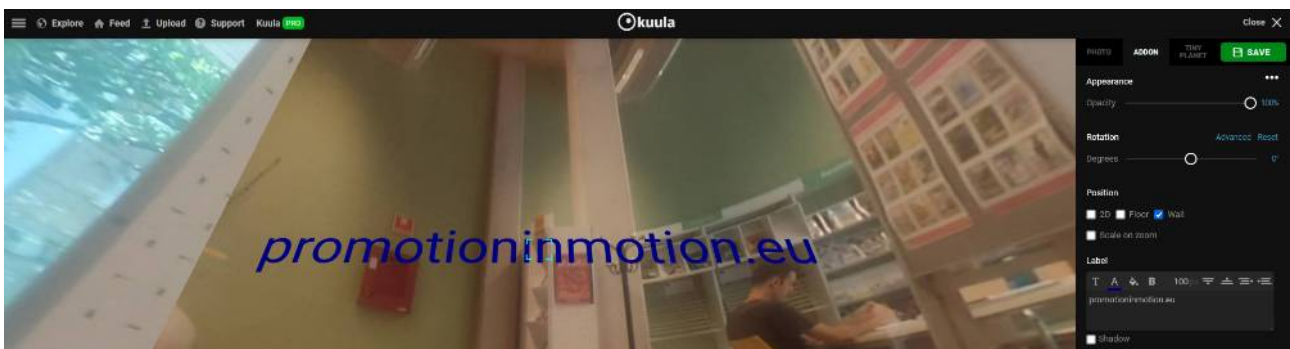

Step 5

once you have select one of the photos that we made in the previous activity and then we can edit them Adding images text and Hotspot

Step 6

we can add text clicking in the text link and edit the text

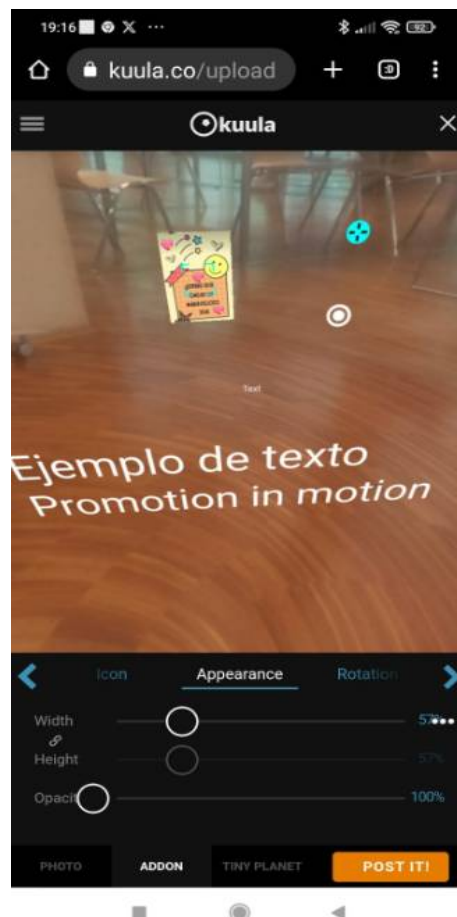

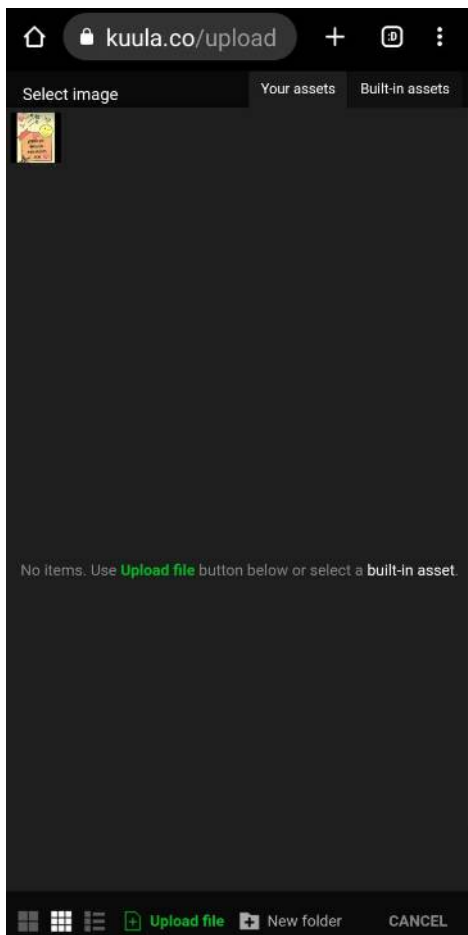

in the mobile phone is very similar . in both systems its important to change the size of the text like in the screen we change it from 20px to **100px**

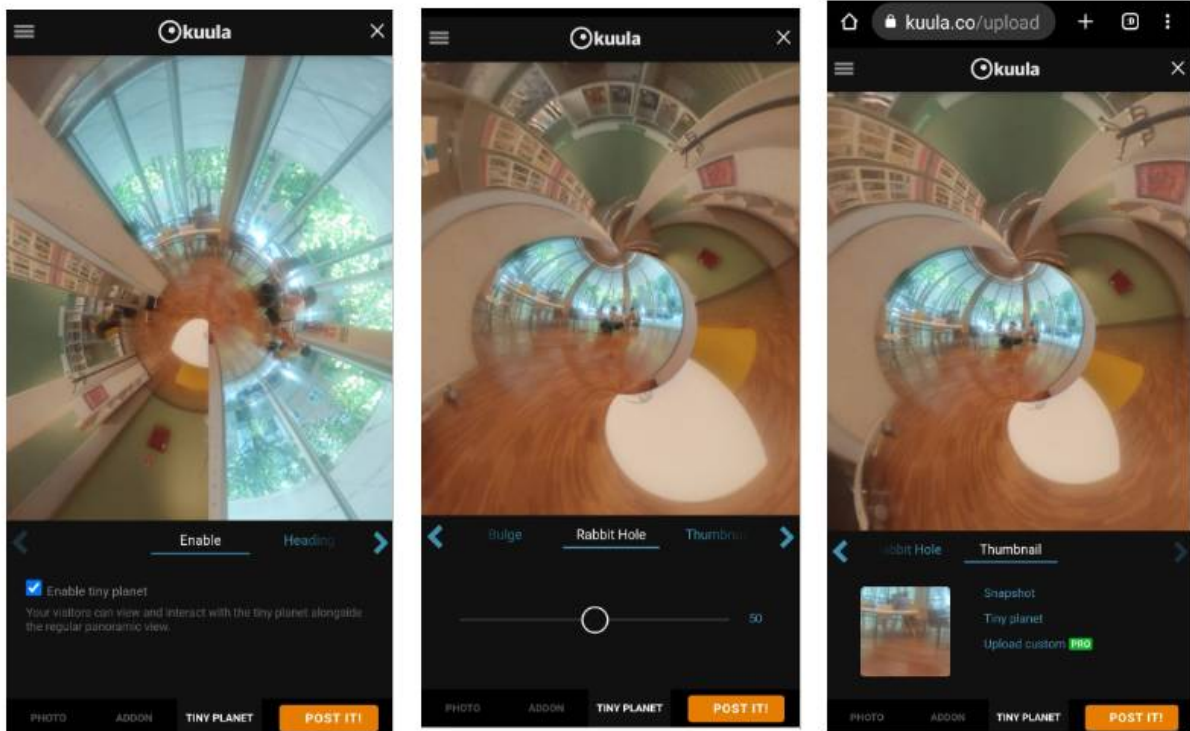

Step 7

we can also add images the the panorama clickin in image and also can change its position, rotation and many other aspects

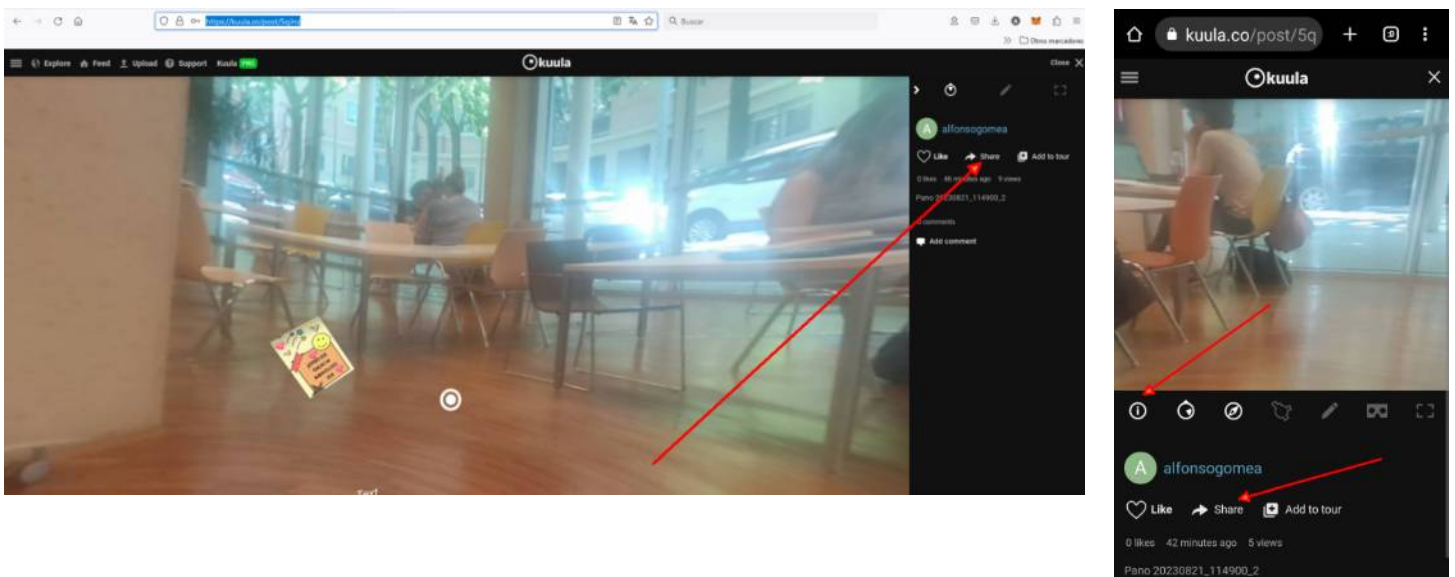

Step 8

Also we can enable the tinyplanet view and configure it as a tinyplanet view and its different characteristics like Rabbit hole , heading, rotation, bulge ... like you can see in the following images

Step 9

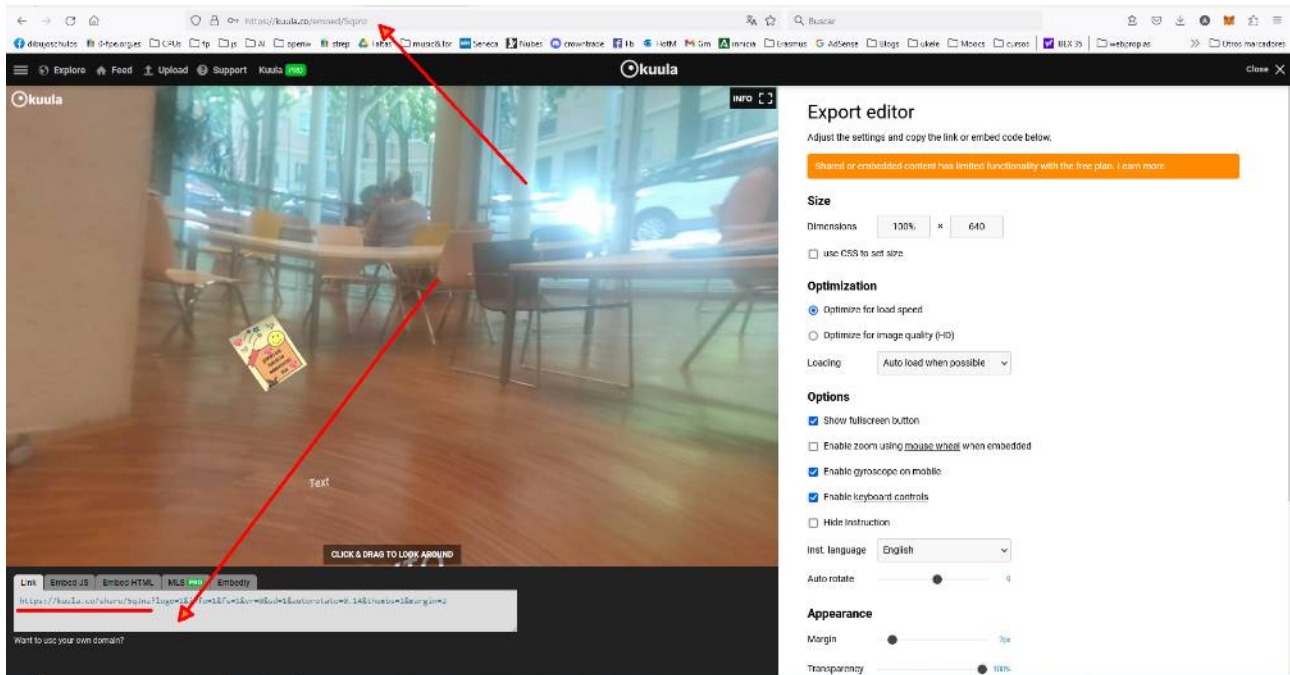

Once we have finish ,we can press post it and the will give us a link that we can use to publish it in internet or our social networks.

Step 10

The export link is something like + (the code of your panorama)
for example

<https://kuula.co/share/5qJnz>

Its possible to explore other users panoramas
